PROFESSIONAL PROFILE

Systems Engineer with over 4 years of experience building high-impact full stack web applications. Specialized in React, Node.js, AWS, and infrastructure automation with Terraform, Docker, and Kubernetes, with experience leading technical teams, defining scalable architectures, and implementing CI/CD pipelines. Oriented toward international remote environments, with the ability to work autonomously and deliver results consistently across distributed teams.

PROFESSIONAL EXPERIENCE

Bartik S.A.S

Full Stack Developer

March 2025 – Present

Bogotá, Colombia

- Designed and implemented cloud architecture on AWS (EC2, S3, RDS, Lambda), managing infrastructure as code with Terraform, containerization with Docker, and orchestration with Kubernetes for scalable, high-availability environments.
- Implemented CI/CD pipelines with GitHub Actions, automating builds, tests, and deployments, reducing delivery times and production errors.
- Developed and integrated a visitor registration application with real-time communication (WebSockets), optimizing access control and traceability, deployed across 2 sites.
- Participated in the design and development of an electronic voting system for a government entity, implementing encryption, security, and audit mechanisms to guarantee data integrity.
- Coordinated architecture guidelines and development standards, ran code reviews, and provided technical mentorship to the team.

Seguridad Penta Ltda

Full Stack Developer

Nov 2021 – Feb 2025

Bogotá, Colombia

- Designed and implemented a full stack enterprise portal (React, Node.js, REST APIs), centralizing internal processes and improving operational efficiency for more than 400 active users.
- Implemented Redis caching to optimize the performance of critical queries, and automated test coverage with Jest, improving system stability and reliability.
- Implemented and optimized an employee lifecycle management system (onboarding, offboarding, and reinstatement), automating critical workflows and improving the efficiency of administrative processes.
- Managed and optimized AWS infrastructure, introducing Docker containers to standardize development and production environments, improving deployment stability and speed.
- Led architecture decisions, best practices, and code reviews, providing technical mentorship to the team.

EDUCATION

Universidad Simón Bolívar

Systems Engineering

June 2025

Barranquilla, Colombia

SKILLS

- **Frontend:** React, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI.
- **Backend:** Node.js, REST APIs, JWT authentication, WebSockets, Redis, relational and non-relational databases.
- **Testing:** Jest (unit & integration tests), Cypress (E2E).
- **DevOps & Cloud:** AWS (EC2, S3, RDS, Lambda), Terraform, Docker, Kubernetes, GitHub Actions (CI/CD), high availability.
- **Version Control:** Git, collaborative workflows, version control, and code review.
- **Methodologies:** Autonomous work in distributed remote teams, asynchronous communication, Scrum / agile methodologies.

LANGUAGES

- **Spanish:** native.
- **English:** technical (reading and writing).

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner
Digital badge – Amazon Web Services (AWS)
Foundational Level – Cloud Practitioner

AWS Certified AI Practitioner
Official certification – Amazon Web Services (AWS)
