Dear Hiring Team,

I am a Systems Engineer and Full Stack Developer with over 4 years of experience developing web and mobile applications, taking part in the design, development, implementation, and maintenance of technology solutions.

I have experience working with technologies such as JavaScript, TypeScript, Node.js, React, React Native, SQL, NoSQL, Docker, and AWS, along with knowledge of software architecture, REST APIs, databases, and cloud services.

I am a problem-solving-oriented person, able to learn new technologies quickly and adapt to different teams and working methodologies. I have also participated in projects that require integrating multiple services and building scalable, maintainable solutions.

I am currently looking for an opportunity that allows me to keep growing professionally, contribute my knowledge to the team, and take on new challenges within the technology field.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience and skills can contribute to your organization.

Best regards,

Alfredo Domínguez

Systems Engineer | Full Stack Developer
